

Here at Stoke Bishop we aim to provide a high quality geography curriculum to inspire, challenge and engage children to understand more about the world around them. Teaching key concepts such as place, space, interconnections, scale, environment, sustainability and change. These will help to provide children opportunities for field work and develop key geographical skills to inspire a love of learning. The intent for geography at Stoke Bishop is to deliver the national curriculum in an engaging, exciting way. An engaging and active geography curriculum can help to raise cultural capital and develop connections through people and events in different places and cultures.
