

At Stoke Bishop CofE Primary School, our intent is that our teaching of the Spanish language and culture will help children to develop a love of learning languages. Learning a foreign language provides so many amazing benefits to children and their futures. It is an opening to other cultures; an opportunity to nurture children's natural curiosity and problem-solving skills; and to foster respect, knowledge and understanding towards another language, culture, and of the World. We believe that all languages should be celebrated and are proud of the numerous languages that are spoken by our school community. At Stoke Bishop, we believe that learning a language and developing a greater depth of understanding towards another culture is an important learning opportunity that helps children to appreciate and understand other cultures, expressions and styles of communication. This can encourage children to appreciate how big the World is and will open their minds greatly. It is an incredibly useful skill to learn and our Spanish curriculum gives children the building blocks to learning the foundations for further foreign language learning at Key Stage 3, which will also aid a smoother transition from primary to secondary school.
